Office Action Summary

Application No.

10/734,271

Applicant(s)

LIAO ET AL.

Examiner

Angel A. Castro

Art Unit

2653

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-9, 11-12 is/are rejected.
- 7) ☒ Claim(s) 4 and 10 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Song et al (U.S. Pat. 6,266,311).

Regarding claim 1, Song et al discloses a protection method for a manual ejection operation of an optical disk drive, a locked state is set when the optical disk drive is in normal rotation, characterized in that:

maintaining the locked state when the manual ejection operation is activated (see column 6, lines 63-67 and column 7, lines 1-5).

Regarding claim 2, Song et al shows that the manual ejection operation is performed by inserting a slim bar into a round opening on a panel of the optical disk drive (see figure 9).

3. Claims 1, 3, 5-9 and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Ogawa et al (U.S. Pat. 6,496,463).

Regarding claim 1, Ogawa et al discloses a protection method for a manual ejection operation of an optical disk drive, a locked state is set when the optical disk drive is in normal rotation, characterized in that:

maintaining the locked state when the manual ejection operation is activated (see figure 18).

Regarding claim 3, Ogawa et al shows that a loading voltage is applied to a tray motor of the optical disk drive for maintaining the locked state when the manual ejection operation is activated (see figure 18).

Regarding claim 5, Ogawa et al discloses a protection method for a manual ejection operation of an optical disk drive, comprising following steps:

sensing a stage change from a first stage to a second stage of a load-sensing switch in a locked state (column 17, lines 14-20); and

returning to the first stage of the load-sensing switch (column 18, lines 7-10).

Regarding claim 6, Ogawa et al discloses that the stage change of the load-sensing switch is sensed when the manual ejection operation is activated (column 17, lines 14-20).

Regarding claim 7, Ogawa et al discloses that the locked state is set when the optical disk drive is in normal rotation (the tray is inside during the normal rotation).

Regarding claim 8, Ogawa et al shows that the manual ejection operation is performed by inserting a slim bar into a round opening 142 (figure 5) on a panel of the optical disk drive.

Regarding claim 9, Ogawa et al discloses that a loading voltage is applied for returning to the first stage (see figures 18 and 21).

Regarding claims 11 and 12, Ogawa et al discloses that the first stage is an on stage or an off stage and the second stage is an on stage or an off stage (see figure 18).

Allowable Subject Matter

4. Claims 4 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angel A. Castro whose telephone number is 571-272-7584. The examiner can normally be reached on Monday through Thursday, 8 AM to 6 PM.

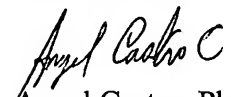

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T. Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
